AI agents are your new coworkers. Learn to supervise them.

Human Loop is a free card game about keeping AI in check at work. Read the agent's plan, check the evidence, and make the call before it resets the wrong thing.

Play free

humanloop.dciworkforce.com

Scan the code or type the address.
No download. Plays in your browser on a phone or laptop.
No sign-up needed: tap **Play now**.

How a shift works

1. **Read the plan**
   Your AI coworker shows you what it wants to do. Most plans are fine. Some are not.
2. **Check the evidence**
   Tap Inspect. Mark the line that looks wrong.
3. **Decide**
   Good plan? Let it run. Bad plan? Block it. Not sure? Ask your team lead.

Five career pathways. Each has its own overeager AI coworker.

Help Desk · Ollie
Cybersecurity · Patch
Cloud & Network · Nimbus
Full-Stack Development · Piper
Business Analyst · Quill

Good to know

- Free. No download.
- Guest play needs no sign-up, any age. Progress stays on your device.
- Every company and person in the game is made up.
- Optional sign-up (13 or older) saves progress. DCI emails only if you say yes.

Employers are adding AI agents to help desks, security, cloud, dev, and analytics teams. These agents can take real actions, fast. Someone has to check their work.

Human Loop lets you practice being that someone.

Demo script: 5 minutes

For the person presenting. Use your phone, or a laptop on a screen.

Before you start

- [ ] Open **humanloop.dciworkforce.com** on the device and the network you will use. Do this once before the meeting.
- [ ] Music is off unless you turn it on. Decide if you want sound.
- [ ] Use the guest path (**Play now**). No sign-up.
- [ ] Start with **Help Desk**. It is the easiest one to follow.

Time	You do	You say
0:00 – 0:30	Open the address. Tap **Play free**, then **Play now**, then the **Help Desk** card.	“This is a card game that teaches a real job skill: supervising AI. An AI coworker makes plans. You check the evidence before it acts.”
0:30 – 2:00	**Practice** (4 tickets, about 90 seconds). Tap **Inspect**, then the plan. Read the evidence. Tap the line that looks wrong. Choose **Block** or **Let it run**.	“Dana is the coach. She tells you the skill: check the plan. After each plan, the game shows what the AI did not check.” If the room hesitates, tap Where do I look?
2:00 – 4:00	Tap **Start the real shift**. Play turns 1 to 3, then stop.	“Now it is real. You start with two cards, Inspect and Block. Plans come one at a time at first, then faster, and new cards join along the way. Energy is limited, so you cannot check everything. Risky plans that run fill the risk bar.”
4:00 – 5:00	If a plan was missed, tap **Show me**. Then open **Menu** and point at **Send feedback**.	“It circles the clue you missed. There are five pathways, each with its own AI coworker. Tell us what you think: Menu, then Send feedback.”

Good to know: A full shift is 7 turns, so you will not finish one in 5 minutes. That is fine. Practice cannot end in a breach, so it is safe to make mistakes there.

Questions you may get

Short answers you can say out loud.

Is it real AI?

The AI coworkers are scripted game characters, not a live chatbot. They cannot say anything unexpected.

Who is it for?

Adult learners in DCI's career pathways. It uses short, plain sentences and works on a phone. Sign-up needs age 13 or older. Guest play has no age limit.

What does it cost?

It is free to play.

Are the companies real?

No. Every company and person in the game is made up.

What data do you keep?

Guest play keeps progress on the device. If a player signs up, their name, email and progress are stored in DCI's Airtable. DCI sends program emails only to people who say yes. Players can delete their data in the game.

What can DCI measure?

For signed-up players: shifts played and won, stars, and how many risky plans they caught, wrongly blocked, or missed, by pathway.

Is it finished?

It is in testing. All five pathways are playable, and we are collecting feedback.

Can I try it now?

Yes. Scan the code on page 1, or type humanloop.dciworkforce.com.

If something goes wrong

- **The page does not load.** Refresh. Switch between Wi-Fi and mobile data. Or use another device.
- **A login page appears instead of the game.** Do not sign in. It means the address is not open to the public yet. Stop and check before you present.
- **You are short on time.** Tap **Menu**, then **Skip practice**, to go straight to the real shift.
- **You want to replay the opening.** Tap **Menu**, then **Replay intro**.

After the demo: Ask people to try it on their own phone. Their notes come to DCI through **Menu**, then **Send feedback**. No name or email is asked for.
